

ENVIRONMENT POLICY

Environment policy of BRIST Axle has 2 main pillars as follows;

1. Serve a better environment with your products

- a. Develop innovative motion solutions to improve zero-emission electric vehicles
- b. Invest on R&D of electric motion solutions
- c. Market electric motion solutions globally and incentivize the use of electric motion solutions

2. Configure the daily operations in a way to minimize the negative effects on the environment

- a. Reduce the use of raw materials and energy for the protection of natural resources
- b. Reduce the waste to the lowest level and to support the recycling and to take all necessary precautions in this regard
- c. Control the environmental impact of wastes and dispose or have disposed of non-recyclable waste without harming the environment
- d. Use products that are eco-friendly
- e. Carry out the necessary activities to comprise the environmental awareness of our employees and for its development in order to achieve our environmental objectives
